| 08.15 – 09.00 |                                              |                                              | **SPH.04201** Atomic spectroscopy  
Prof. Acuna  
PER08, 0.51 |                                              |                                              |
| 09.15 – 10.00 |                                              |                                              | **SPH.04009** Proseminars  
Profs Trappe & Brader  
PER08, 0.51 |                                              |                                              |
| 10.15 – 11.00 | **SPH.04722** Numerical methods for physicists  
Prof. Medo  
PER08, 2.73 | **SPH.04729** Optical spectroscopy and topological materials  
Prof. Akrap  
PER08, 0.51 | **SPH.04605** Intro to the many-body problem  
Prof. Brader  
PER08, 2.73 | **SPH.04401** Structure and dynamics of matter  
Profs Aebi & Scheffold  
PER08, 0.51 |                                              |
| 11.15 – 12.00 |                                              |                                              |                                              |                                              |                                              |
| 12.15 – 13.00 |                                              |                                              |                                              |                                              |                                              |
| 13.15 – 14.00 |                                              |                                              | **"SPH.04211"** Atomic spectroscopy  
Exercises  
PER08, 2.73 |                                              |                                              |
| 14.15 – 15.00 | **"SPH.04411"** Structure and dynamics of matter  
Exercises  
PER08, 2.73 | **"SPH.04615"** Intro to the many-body problem  
Exercises  
PER08, 2.73 |                                              | **"SPH.04734"** Introduction to experimental astrophysics  
Profs Kohn & Robyr  
PER08, 0.51 |                                              |
| 15.15 – 16.00 |                                              |                                              |                                              |                                              |                                              |
| 16.15 – 17.00 |                                              |                                              |                                              |                                              |                                              |
| 17.15 – 18.00 |                                              |                                              | **SPH.04008** Colloquia  
Prof. Werner  
PER08, 0.51 |                                              |                                              |
| 18.00 – 19.00 |                                              |                                              |                                              |                                              |                                              |

* even weeks - * odd weeks - + courses distributed over three semesters: PH.4003, Project 

Elective courses offered by the Physics Dpt – other possible courses + elective courses “other” to be discussed with the study advisor.
