Arbeiten manuell hinzufügen

Adding works manually

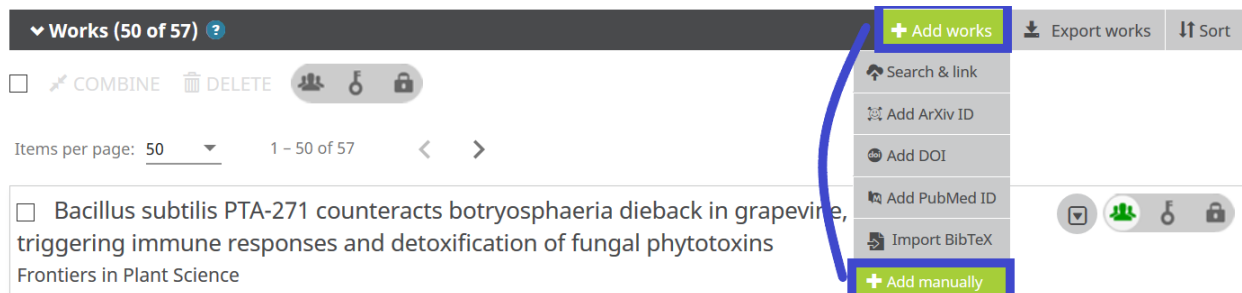

Screenshot

Version 31 mars 2020

a. Add works manually

If some publications cannot be retrieved from Scopus or Web of Science, try **CrossRef Metadata Search** first before adding them manually.

- Under Works, click on “+ Add Works” and then “+ Add manually”.

The screenshot shows a user interface for managing works. At the top, there is a header with 'Works (50 of 57)' and a '+ Add works' button. Below this, there are several icons for actions like 'COMBINE', 'DELETE', and 'lock'. A dropdown menu is open from the '+ Add works' button, showing options: 'Search & link', 'Add ArXiv ID', 'Add DOI', 'Add PubMed ID', 'Import BibTeX', and '+ Add manually'. The '+ Add manually' option is highlighted with a blue box. Below the menu, there is a list of works, with the first one being 'Bacillus subtilis PTA-271 counteracts botryosphaeria dieback in grapevine, triggering immune responses and detoxification of fungal phytotoxins' from 'Frontiers in Plant Science'.

- **Fill in the required information**
- ORCID allows adding different categories of works: Publications, Conference, Intellectual properties, Others).
- It is highly recommended to **also fill in the identifier of the work**, e.g. **DOI for journal articles**, or **ISBN for books**. If no identifier is available, **fill in a URL**.
- After completing the form, click **Add to list** to submit.
